Bill Grade

C

Bill contains excessive markups with 46% overcharge, representing $4,709 in potential savings.

POTENTIAL SAVINGS

$4,708.94

TOTAL BILLED	FAIR VALUE	ISSUES FOUND
$10,150.87	$5,441.93	6 issues

This pneumonia treatment bill from Jackson Purchase Medical Center shows significant overcharging across laboratory tests and respiratory treatments. For example, a basic blood draw was billed at $69 when the fair rate is $9, and an EKG was charged $288 versus a fair rate of $6. Multiple respiratory treatments on the same day appear duplicative, with each nebulizer treatment billed at $117 when the fair rate is under $8.

📄 **Insurance Note:** If insured, verify these charges against your plan's contracted rates as they may be significantly lower than these billed amounts

Section 3: Action Plan

1. Request itemized bill with detailed service descriptions and dates
2. Challenge excessive laboratory and EKG markups citing Medicare fee schedules
3. Question multiple nebulizer treatments on same dates for medical necessity
4. Ask for financial hardship assistance given 46% overcharge rate
5. Consider appealing through hospital's billing dispute process
